Redd School Summer

CAMP

*Pack your summer
with a world of friends,
new experiences
and fun-filled activities!*

Outer Space has many mysteries. Through time, many have tried to explain the “beyond” through legend and exploration. This summer, our mission is to investigate space and early astronomers such as Native Americans, Greeks and Romans through art, legend, science and games.

Team Building

Arts & Crafts

Computers

Swimming

Sports & Games

Horseback Riding

Fun Fridays

Drama

Music

Animal Care

Science

Invent & Construct

Tae Kwon Do

Robotics

AND LOTS MORE!

Customize your summer by combining Camp with Summer School

Swimming Lessons: Children learn in small groups with others of similar abilities and age. Lessons are offered in four week sessions, four lessons per week. Fridays are used for rain/make-up days.

Horseback Riding: Private and semi-private lessons are offered for an hourly fee. Our horses are used to teach equestrian skills and equine care.

Summer School can be combined with camp or done alone. The students meet with teachers 4 days per week for a customized learning experience. We can work towards:

REMEDATION MAINTENANCE ENRICHMENT

Successful “START” Program

(Pre Kindergarten, Kindergarten, First Grade)

We believe that a child’s ultimate success in school depends on the strength of his educational groundwork. We offer testing and assessment, planned Individual programs and follow through to establish a successful learning foundation.

Math (K-8)

Latest manipulatives allow your child to see, touch and understand math concepts. This visual hands-on approach results in new understanding.

Reading/English Skills (K-8)

These skills are taught according to each child’s learning style. We encourage a love for reading and work at immersing each child in the joys of literature and research, while teaching basic grammar and interpretation.
